Description:

NFPA 70E® compliance saves lives, reduces liability, and helps avoid unexpected downtime and revenue loss. Now, the 2015 Standard takes another big step in changing the way America works. The 2015 NFPA 70E: Standard for Electrical Safety in the Workplace® helps you assess electrical risks on the job, making users more aware of the potential for devastating loss. The 2015 edition of NFPA 70E introduces a major change in how stakeholders evaluate electrical risk -- so that owners, managers, and employees can work together to ensure an electrically safe working area and comply with OSHA 1910 Subpart S and OSHA 1926 Subpart K. If you're responsible for

ensuring workers are protected from shock and arc flash hazards, use the 2015 NFPA 70E along with the 2014 NFPA 70®: National Electrical Code® (NEC®) and the 2013 NFPA 70B: Electrical Equipment Maintenance. Together, the "Big Three" help you protect your personnel and your company from tragic loss. NFPA 70E is a vital tool for contractors, risk managers, engineers, building managers, owners, and everyone concerned with ending electrical-related accidents, liability, and loss.
