Description:

Review

Anyone seriously interested in who we are and how we function should read this book.

(Peter Forbes *The Guardian*)

Nessa Carey takes us on a lively and up-to-date tour of what's known about epigenetic mechanisms and their implications for ageing and cancer.

(Laurence Hurst, University of Bath *Focus Magazine*)

[Nessa Carey's] book combines an easy style with a textbook's thoroughness.... A bold attempt to bring epigenetics to a wide audience.

(Jonathan Weitzman *Nature*)

Carey's report on the rapidly developing state of epigenetics research may help nonscientists with public-policy, investment, and health-care decisions.

(*Booklist*)

An exhilarating exploration of an exciting new field, and a good gift for a bright biology student looking for a career choice.

(*Kirkus Reviews*)

An enlightening introduction to what scientists have learned in the past decade about [epigenetics].

(Carl Zimmer *The Wall Street Journal*)

This book provides an excellent introduction to a fascinating new field that may revolutionize our understanding of human health and disease. Highly recommended.

(*Library Journal*)

A must-read for every intelligent person who likes to know what is going on in modern science.

(Graham Storrs *New York Journal of Books*)

she provides an excellent and largely accurate account of a fascinating and fast-moving area of modern biology.

(Jonathan Hodgkin *Times Literary Supplement*)

Written in an engaging manner using everyday metaphors to clarify complex concepts and utilizing well-defined diagrams, the author has produced an outstanding book with her wit and expertise.

(Rita Hoots *NSTA Recommends (National Science Teachers Association)*)

About the Author

Nessa Carey earned her Ph.D. in virology from the University of Edinburgh and is a former senior lecturer at Imperial College in London. She works in the biotechnology and pharmaceutical sectors, and for the past seven years has specialized in epigenetics. She has strong relationships with leading epigenetics researchers, medical labs in Europe, and some of the most prestigious institutions in the United States. These include the Harvard Medical School, the University of Pennsylvania, the Wistar Institute, the MD Anderson Cancer Center, and the University of Southern California.
