Description:

Grounded in theory and research on complex childhood trauma, this book provides an accessible, flexible, and comprehensive framework for intervention with children and adolescents and their caregivers. It is packed with practical clinical tools that are applicable in a range of settings, from outpatient treatment centers to residential programs. Rather than presenting a one-size-fits-all treatment model, the authors show how to plan and organize individualized interventions that promote resilience, strengthen child-caregiver relationships, and restore developmental competencies derailed by chronic, multiple stressors. More than 45 reproducible handouts, worksheets, and forms are featured; the large-size format facilitates photocopying.
