Description:

Pharmacology can be difficult. But with the right text, understanding drugs and how they work doesn't have to be! Using easy-to-follow language and engaging learning tools — like *Memory*

Joggers, Clinical Pitfalls, Do Not Confuse, and Drug Alerts — the second edition of **Understanding Pharmacology: Essentials for Medication Safety** helps readers really understand *how* drugs work. In addition to the popular critical thinking activities from the first edition, the second edition also includes more chapter review questions, updated content, and a new organization that centers on the different body systems. For students who have a limited background in the sciences and want complete preparation for licensure exams and clinical practice, there is no better choice than **Understanding Pharmacology, 2nd Edition!**

- Entire unit reviewing math, weights and measures, and dosage calculation minimizes readers' anxiety and promotes medication safety.
 - **Clever, easy-to-recognize margin icons** help visual learners remember essential side effects of drugs.
 - **Simplified heading structure** replaces intimidating terminology (i.e. pharmacokinetics) with simplified language (How These Drugs Work) to increase understanding of concepts.
 - **Drug Alert!, Do-Not-Confuse, and Clinical Pitfall boxes** highlight important tips for safe medication administration.
 - **Memory Jogger boxes** help readers remember important drug information.
 - **Get Ready for Practice sections** at the end of each chapter include key points, chapter review questions, and critical thinking activities to reinforce learning.
 - **10th grade reading level** uses straightforward, everyday language to really enhance readers' understanding of pharmacology concepts.
 - **Incorporation of adult learning theory** features both a simple to complex organization of material along with answers to *why* readers need to learn something.
 - NEW! Body system organization helps readers better understand drugs that are specific to particular body systems.
 - **NEW! More chapter review questions** have been added to the text. All review questions are now organized into one of two categories: *Test Yourself on the Basics* and *Test Yourself on Advanced Concepts*.
