Description:

This full-color photographic atlas is designed as a visual reference to accompany any human anatomy, human physiology, or combined human anatomy and physiology textbook or lab manual. It will be of particular value to students in the laboratory setting.

Features include the following:

More than 600 high-quality, carefully labeled photographs, micrographs, and illustrations serve as visual references for students;

completely labeled, informative figures are depicted clearly and accurately;

multiple images of the muscular, skeletal, and other organ systems provide a complete picture of the layers of human anatomy;

microanatomy is presented as a guide for students microscope work in the lab;

photographs of sheep heart, brain, and eye dissections are included;

cat, fetal pig, and rat dissections are included
